

Esker Family-Challenge

It is MATHS WEEK! In Esker ETNS we are working really hard on understanding TIME! Please work together to work out similarities and differences between how we interpret time in English compared to another language of your family's choice. If you only speak English at home then pick another language someone in your family may have learnt at school, or may be interested in, and use a dictionary or online sources to help!

We will use these to help us study time in school. All entries will be entered into a draw to win a family prize! Please return by Thursday 21st October.

School Language: English	Other Language: _____	Optional Comments: <i>For example: Is there anything interesting about this word in the other language? Does it have an interesting origin or is it used differently? Is there an alternative way of describing the same word?</i>
One second		
One minute		
One hour		
One day		
One month		
One year		
Leap Year		
One decade		
One century		
Fortnight		
Annual/ per annum		
Seasons: Spring Summer Autumn Winter		

English	Other Language	Optional Comments
O'Clock Half Quarter Past To AM PM		
Times of the day: Morning Dawn Midday Afternoon Dusk Evening Night Midnight		
		Are there any words related to time in this language that we don't have in English?
 <p>Half past nine. 09:30 or 21:30.</p>		Is the clock read in the same way in this language? Discuss together and summarise here:
 <p>Quarter to six. 05:45 or 17:45.</p>		Is the clock read in the same way in this language? Discuss together and summarise here:
<p>Challenge Question:</p> <p>During the third hour after midnight the hands on a clock point in the same direction (so one hand is over the top of the other). At what time, to the nearest second, does this happen?</p>
